Greatest Common Factor of 3 and 5 GCF(3,5)

In mathematics, the greatest common factor (GCF), also known as the greatest common divisor, of two (or more) non-zero integers a and b , is the largest positive integer by which both integers can be divided. It is commonly denoted as $\text{GCF}(a, b)$. For example,

Greatest Common Factor

Factor of 5 and 9

GCF(5,9)

The greatest common factor (GCF) of a set of numbers is the largest factor that all the numbers share. For example, 12, 20, and 24 have two common factors: 2 and 4. The largest is 4, so we say that the GCF of 12, 20, and 24 is 4. GCF is often used to find common denominators.
