As a result, Gestalt psychology has been extremely influential in the area of sensation and perception (Rock & Palmer, 1990). One Gestalt principle is the figure-ground relationship. According to this principle, we tend to segment our visual world into figure and ground. Figure is the object or person that is the focus of the visual field, while the ground is the background. As shows, our ...

### Gestalt Principles of Perception | Introduction to Psychology

A Gestalt exploration respects, uses and clarifies immediate, "naive" perception "undebauched by learning" (Wertheimer, 1945, p. 331). Gestalt therapy treats what is "subjectively" felt in the present, as well as what is "objectively" observed, as real and important data. This contrasts with approaches that treat what the patient experiences as "mere appearances" and uses interpretation to ...

### Gestalt Therapy: An Introduction

In a learning environment, the Gestalt Theory applies to problem solving and perception. However, it can be used in all aspects of education. A perfect example was provided by Wertheimer himself, when he asked children to find the area of a parallelogram. He suggested that, as long as parallelograms had a normal shape, the children could apply the standard procedure in order to determine the ...
