Lecture 1: Introduction and Optimization Problems ... As we'll talk about, traditional experimentation is and will remain important, but now it has to really be supplemented by computation. We'll talk about three kinds of models--optimization models, statistical models, and simulation models. So let's talk first about optimization models. An optimization model is a very simple thing. We start ...

Currently, many IoT solutions are based on basic telemetry. The telemetry function captures data from edge devices and stores it in a data store. Our approach extends beyond basic telemetry. We aim to model problems in the real world through machine learning and deep learning algorithms and implement the model through AI and Cloud on to edge devices. The model is trained in the cloud and ...
