Like the adult, the gray tree frog tadpole has inconsistent coloring, including different shades of brown or olive green. As tadpoles, they are scarlet or orange-vermilion with black blotches around the edge of the crests. The body and tail are patterned with many specks of black and gold. As the individual ages, it develops its adult coloration. Size. Adult male gray tree frogs are around 1 ...

Globally, 50 to 70 percent of all wetlands are peatlands. Peatlands are the most widespread and abundant of all wetland types. They cover over four million square kilometers, or three percent of the land surface, and contain ten percent of all freshwater, and one-third of the world's soil carbon, making them crucial in regulating atmospheric carbon dioxide.

What is a Fen? - US Forest Service

The three stars on each page indicate the level of reading passage: Easy, Medium, or Hard. Our collection for young readers includes Mini-Books with illustrations and large text that students will enjoy coloring and taking home. Parents, teachers, and caregivers will find instructions for printing, cutting, and folding the Mini-Book on each page. And for the leveled passages for older students ...
