Jeffrey Coolidge Stone / Getty Images. The mnemonic linking method (also called "chaining") consists of developing a story or image that connects together pieces of information you need to remember. Each item leads you to recall the next item. For example, imagine that you need to remember to bring the following things with you to school in the morning: homework papers, glasses, gym shoes ...

Dissociative identity disorder (DID), previously known as multiple personality disorder (MPD) and colloquially known as split personality disorder, is a mental disorder characterized by the maintenance of at least two distinct and relatively enduring personality states. The disorder is accompanied by memory gaps beyond what would be explained by ordinary memory issues.
