Medium-chain fatty acids (also known as medium-chain triglycerides or MCTs) have 6-12 carbons. Examples of foods that contain medium-chain fatty acids include coconut oil and MCT oil. Butter and cream also contain a small amount of MCTs. Long-chain fatty acids have 13 or more carbons. Most of the fats in food are made up of long-chain fatty ...

### All You Need to Know About Healthy Fats on a Keto Diet - Diet Doctor

In the 1960s, medium-chain triglycerides (MCTs) were found to produce more ketone bodies per unit of energy than normal dietary fats (which are mostly long-chain triglycerides). MCTs are more efficiently absorbed and are rapidly transported to the liver via the hepatic portal system rather than the lymphatic system. The severe carbohydrate restrictions of the classic ketogenic diet made it ...

### Ketogenic diet - Wikipedia

Its coconut base contains medium-chain triglycerides, which are known to improve the absorption of CBD oil on top of providing a stable source of energy for the brain. The oil has a 1-mL dropper with fraction marks to improve its accuracy. What Determines the Quality and Price of CBD Oils? Hemp Source. Hemp is the plant material used for CBD oil extraction.
