Applications in Supply Chain ...
In the fifth step, mostly multicriteria

In the fifth step, mostly multicriteria decision making is carried out to see whether the PV plant is performing better in terms of the considered analysis (for example energy, emission, exergy, economic). The last step is the social consideration where the interests of individuals, groups, communities, and society are considered in relation to the PV plant installation at that site.

Sun Path Diagram - an overview | ScienceDirect Topics

A microgrid is a decentralized group of electricity sources and loads that normally operates, connected to and synchronous with the traditional wide area synchronous grid (macrogrid), but is able to disconnect from the interconnected grid and to function autonomously in "island mode" as technical or economic conditions dictate. In this way, microgrids improve the security of supply within the ...
